Preparation

Part Number: PT29A-48111-XX

PT29A-33100-28 PT29A-00140-10 PT29A-00120-01 PT29A-33130-01 PT29A-53140-01

#### **Kit Contents**

Item#	Quantity Reqd.	Description
1	1	Molding, LH Front Door
2	1	Molding, LH Rear Door
3	1	Molding, RH Front Door
4	1	Molding, RH Rear Door

## **Hardware Bag Contents**

Item#	Quantity Reqd.	Description
1		
2		

### **Additional Items Required For Installation**

Item#	Quantity Reqd.	Description
1		
2		

### **Conflicts**

None

#### **Recommended Tools**

Personal & Vehicle	Notes
Protection	
Safety Glasses	
Vehicle Protection	Seat & Floor Covers
Special Tools	Notes
Roller	Hard Rubber Hand Roller,
	1" to 3" wide.
Non intrusive Infrared Temp	
Probe/Gun	
<b>Installation Tools</b>	Notes
Flexible Scale or Tape	
Measure	
Masking Tape	2" wide
Clean Lint-free Cloths	
Straight Edge (Plastic)	
Heat Gun (if required to	
warm surfaces)	
Heat Source	
<b>Special Chemicals</b>	Notes
Cleaner	3M <sup>™</sup> Prep Solvent-70

## **General Applicability**

Body Side Molding can be installed on all IS 250/350 2014 or later Models

**BODY SIDE MOLDING** 

### **Recommended Sequence of Application**

	<u> </u>
Item#	Accessory
1	Body Side Molding
2	Door Edge Guards

\*Mandatory

#### **Vehicle Service Parts** (may be required for reassembly)

Item#	Quantity Reqd.	Description

#### Legend

**STOP:** Damage to the vehicle may occur. Do not proceed until process has been complied with.

**OPERATOR SAFETY:** Use caution to avoid risk of injury.

<u>CAUTION:</u> A process that must be carefully observed in order to reduce the risk of damage to the accessory/vehicle and to ensure a quality installation.

<u>TOOLS & EQUIPMENT:</u> Used in Figures calls out the specific tools and equipment recommended for this process.

**REVISION MARK:** This mark highlights a change in installation with respect to previous issue.

rSAFETY TORQUE: This mark indicates that torque is related to safety.

Care must be taken when installing this accessory to ensure damage does not occur to the vehicle. The installation of this accessory should follow approved guidelines to ensure a quality installation.

These guidelines can be found in the "Accessory Installation Practices" document.

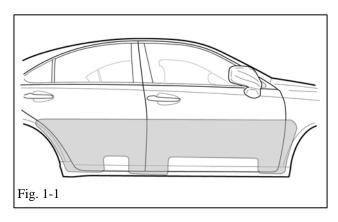

This document covers such items as:-

- Vehicle Protection (use of covers and blankets, cleaning chemicals, etc.).
- Safety (eye protection, rechecking torque procedure, etc.).

IS

- Vehicle Disassembly/Reassembly (panel removal, part storage, etc.).
- Electrical Component Disassembly/Reassembly (battery disconnection, connector removal, etc.).

Please see your Lexus dealer for a copy of this document.

## 1. Vehicle Preparation

(a) Before working on the vehicle, protect the seats and carpets with covers.

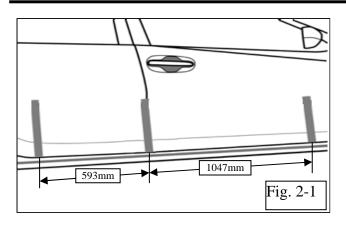

- (b) The work area, body side moldings, and vehicle door surface temperatures must be at least 60°F.
- (c) Saturate a clean lint-free cloth with 3M<sup>™</sup> Prep Solvent-70 and clean the areas of each door as shown in Fig. (1-1).

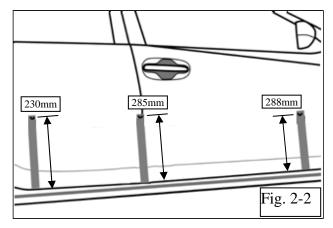

- (1) When cleaning with 3M<sup>™</sup> Prep Solvent-70, follow the manufacturer's directions.Do not allow cleaner to air dry.
- (d) Wipe the cleaned surfaces with a clean, dry, lint-free cloth.

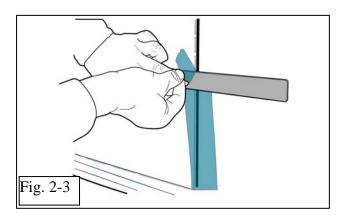

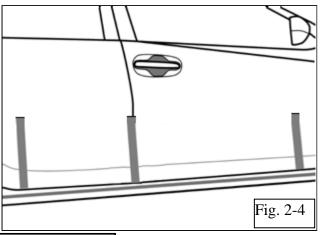

**NOTE:** Once cleaned do not contaminate this surface by touching it with your bare hands.

IS

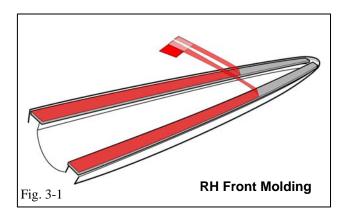

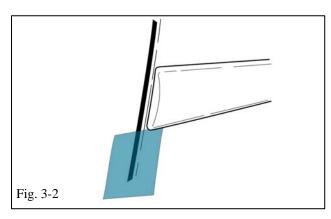

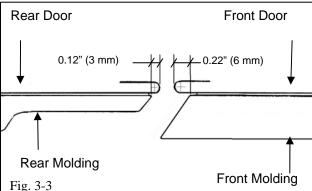

## 2. Alignment Tape Application

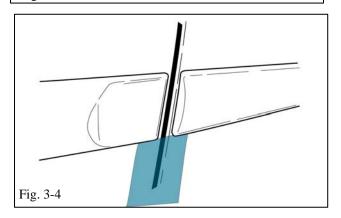

- (a) Measure 1047mm forward from the bottom rear edge of the front door and place a vertical piece of tape on the front door approximately 350mm long. Place a vertical piece of tape over the door gap between the front and rear doors approximately 350mm long. Measure 593mm rearward from the front bottom edge of the rear door and place a vertical piece of tape on the rear door approximately 350mm long. See (Fig. 2-1).
- (b) Measure up from the bottom of the door edges and place a horizontal mark on the three vertical pieces of tape as shown (Fig. 2-2).
- (c) Using a straight edge, tear the vertical tape along a horizontal line at the upper mark as shown in Fig. 2-3 & 2-4
- (d) Repeat Steps 2(a) to 2(c) for the other side of vehicle.

IS

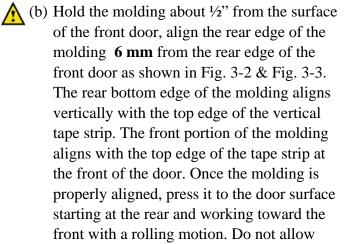

# 3. Body Side Molding Installation.

(a) On the inside of each of the four moldings is identified as to their correct position on the vehicle. Start with the RH front door molding. While carefully holding the molding by its edges, pull the plastic tape at the end of the part to remove the orange release liner from the black acrylic foam tape strips. (Fig. 3-1)

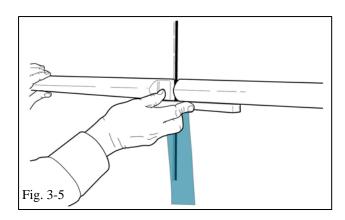

NOTE: Once the release liner is removed from the molding, the surface of the foam tape must not be touched!

(c) Repeat steps 3 (a) and 3 (b) for the RH rear door molding placing the front edge of the molding 3 mm from the door edge as shown in Fig. 3-3 and Fig. 3-4.

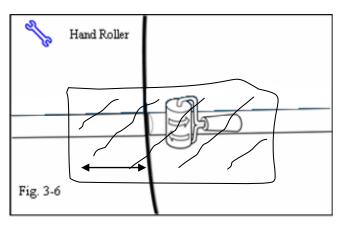

both ends to contact and stick to the door

before the center contacts.

IS

**NOTE:** A good way to ensure that where the rear and front molding meet between the doors align vertically is to hold a plastic straight edge against the bottom of the front molding and use it as a guide for the rear molding as shown in Fig. 3-5. Tolerance for alignment in the vertical direction of the front and rear molding in relation to each other is 0.0mm +/-1.0mm.

- (d) Using the hand roller and clean rag, roll around the perimeter of the parts with firm pressure to ensure complete adhesion of the tape to the door surface. Use the rag to protect the sheet metal and the molding. (Fig. 3-6)
  - (e) Remove and discard all the tape strips.
  - (f) Repeat the entire installation procedure for the other side of the vehicle.

Ensure no damage (including scuffs and After accessory installation and removal of scratches) was caused during the protective cover(s), perform a visual installation process. (For PPO installation, refer to Accessory Quality Shipping inspection. Standard.)
